Black

Black is the negation of color, it is conservative and goes well with every color except the very dark ones. Black can be serious, sober, conventional, mysterious, sexy and sophisticated. When used in clothing black is visually slimming and like other dark colors if used in interiors will make the appearance shrink in size and even a well lit room will appear dark if it has black walls.

In many western countries black is the color of mourning, among young people black is often seen as a color of rebellion. When color is combined with orange it gives an impression of Halloween. Black color is worn and used to convey a sense of aloofness, elegance, sophistication and to add a touch of mystery, Black when used with dark colors tends to blend in together, it's better to use it with light colors.
