Blue

Blue is the coolest color in the spectrum. It is the color of calm! It can be strong, steadfast, light, friendly and sometimes even gloomy. Blue is a natural color from the blue of the sky and is a universal color. The cool, calming effect of blue can do wonders on your mind and can make you go into a peaceful sleep quickly. Blue is good for bedrooms but too much blue can dampen your spirits.

Blue can be important, confident, somber or even sinister. Just as seeing the color red alludes strong emotions, feeling blue or getting the blues represent extremes of calm feeling which can be associated with sadness and depression.
